

Congratulations! You have successfully accessed your module in clickUP.

We would like to get to know our students before the course work commences on 12 July 2010. The Discussions Tool will be used for this activity. Remember that the messages sent in this way will be viewed by all students registered for this module.

Please reply to this message and provide the following information:

- Introduce yourself to the other students: who you are, where you live and work and any other interesting fact about yourself – you may attach a photograph of yourself.
- Provide at least one URL (internet address) that shows your interest, hobby or favourite travel destination – or any other site that you find interesting.

Your reply will confirm to us that you have managed to logon to clickUP successfully and are ready to start your course. We are looking forward to your contribution, and can't wait to meet you!

**Please note that the course content, including the study guide, schedule, course notes etc., will only become accessible when the academic programme starts on 12 July!**

**IMPORTANT:**

**Read the document titled "Access, Settings and Tools" on the Home page.** Install the Java Client software on your computer and apply all the settings outlined in the document. The [clickUP Helpsite](#) contains a lot of very useful information on using clickUP - it is well worth a visit!
